Incredibly quick and easy assembly.

The new Inaca Pop-Up, in its three sizes, is quick and easy to set up: the design of its structure allows it to be set up by a single person in less than a minute.

It's built with high quality materials: waterproof PU coated Oxford Polyester, fiberglass frame and painted steel poles.

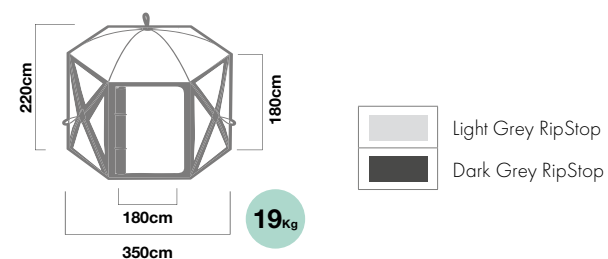

Compact dimensions and light weight: Very easy to transport in its included bag.

With skirts on all sides, it offers insect-proof protection.

Removable floor included.

Pop-Up 350 tent with tunnel

The Inaca Pop-Up 350 with tunnel offers the same advantages as its sister, the Pop-up 350, but with double access and a tunnel that allows it to be attached to the rear or side door of a camper vehicle.

At its end it is provided with a double kedder that adapts to any caravan rail or to any awning front rail.

The tunnel is adjustable in height in a range between 240 and 270 cm.

By rolling up the Pop-Up tunnel, the tent can be used autonomously, without getting in the way and taking up very little space.

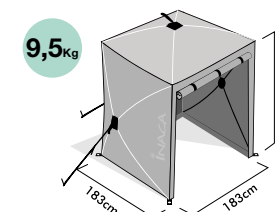

The DRIVE AWAY connector allows for quick connection and disconnection between the vehicle and the Inaca Pop-Up with tunnel.

The double Kedder is passed through the awning rail and connected to the tent tunnel using PVC coupling kit.

INACA Pop-Up Garage Tent

The Inaca Pop-Up Garage Tent is so easy to set up that one person can set it up in less than 1 min. in three simple steps.

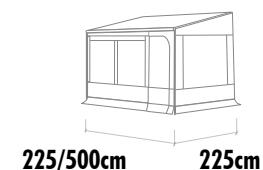

It is built from high quality materials: fiber frame and PU coated Oxford Polyester tent.

Compact dimensions: Really easy to transport in a bag designed for this purpose.

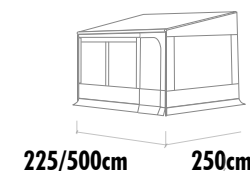

CaravanStore Panels

Sizes:

CARAVANSTORE

CARAVANSTORE **XL**

Side panels

The panels are available to be attached to FIAMMA CaravanStore and CaravanStore XL, which is usually installed in a caravan.

The optimum height for which it is available is 245 cm, there being a reasonable margin in both directions and the anchors are adjustable in height.

They are made of polyester PVA RipStop, fully breathable, very light and resistant.

The panels are sold separately providing great flexibility in the combinations and their grey colors scheme fits perfectly with the Caravanstore tones.

Both side panels have a wide window with the option to include curtains.

The frame (roof pole) is made of anodized aluminum.

Front panels

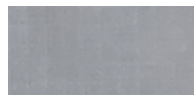

The front is configured for the different Caravanstore and has in all cases a roller door, with zip and one/two windows also with option to fit curtains.

The front and the side are attached to cotton tapes, to the legs of the canopy itself. In this way we gain in lightness and flexibility. Also available in an adaptable version to F35 canopies in all its dimensions, matching all its specifications.

Nomad Life S

Perfect fit and top quality finishes.

The Nomad Life S is designed to be optimized for caravans, low-slung motorhomes and camper vans in a height range of 220-250cm.

The side and front panels are zipped together and can be used independently.

The standard front panel is 290cm long and can be easily extended with optional panels (including an extra door panel) and placed where needed.

The front panel and the included tube allow for a balcony configuration.

The side panels have large doors and mosquito nets with transparent covers.

They are equipped with all the necessary elements for a perfect fit to the wall of the vehicle, whether straight or curved.

All windows have covers that allow them to be gradually closed independently from the inside.

The Nomad Life S is built from high-quality acrylic material that gives it warmth and resistance to external agents that are unique in its class.

Adaptable to awnings with a depth of 250 cm, with a minimum length of 300 cm.

Nomad Life S

STANDARD PANELS

OPTIONAL PANELS

Premium privacy for Camper Van.

The Nomad Life Van adapts the concept of modular acrylic panels from the Nomad Life family to the camper world, where versatility, lightness and quick assembly are key.

The panels can be installed independently and are connected to each other quickly and easily using zippers.

The 250 cm front can be extended with interchangeable 20 and 50 cm modules that allow total adaptation to the dimensions of your awning.

In addition, the front panel and the included tube allow for verandah-style opening.

The 200 cm deep sides are designed for universal adaptation to any camper model.

They have large mosquito nets with glass covers that allow full ventilation of the interior.

All the windows of the Nomad Life Van have interior covers that allow you to adjust the light and the level of privacy from inside the space.

The height range covered by the Van version is 180 cm to 220 cm, ideal for awnings from 250 cm in length.

Acrylic Awning

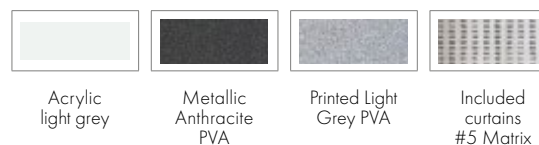

It is manufactured with acrylic materials. That offers the solidity and resistance of long-lasting awnings.

The attention to detail and a successful design make it an excellent awning for camping lovers.

The front is divided into two removable panels and consists of two/four fixed windows and a door on each side.

Each side panel is removable and has a door and a window with mosquito net on both sides.

The flaps will be collected on the inside of the awning and the peggings on the outside.

Premium design and finishes

Available in three versions: standard in 250 cm depth, with extra space in 300 cm and also in 350 cm. It is an attractive awning, with a new and refined design and an elegant combination of colors.

The front consists of 4/6 panels, all removable and interchangeable, 3/4 of them consist of fixed windows and smooth design, the other/s has a sliding door to any position thus offering all the possibilities of transformation.

Each side is removable and has a door and a folding window with mosquito net. In the 350 cm model we add a fixed window.

This model can be completely closed, since it has covers on the windows. It can also be used as a sunshade and, optionally, the panels can be installed as front and side verandas.

Resistance and breathability

Available in two versions: standard with a depth of 250 cm and with an extra space of 270 cm.

It is an innovative awning that combines a very robust PVC polyester roof with PVA polyester front and side panels:

Maximum resistance without sacrificing the comfort and breathability of PVA:

The front panel is made up of 2/3 removable and interchangeable panels.

One of them consists of fixed windows, the other has a door and a fixed window.

Each side is removable and interchangeable, and has a door and a folding window with a mosquito net.

This model can be completely closed as it has covers on the windows.

It can also be used as a sunshade awning and can optionally be enabled as a front and side balcony

Puigmal²⁵⁰

PVC Winter awning

Strong and compact winter awning, with reinforced structure and double apex roof.

Of standard dimensions and for that reason only adaptable to caravans with the suitable dimensions (+/- 265 cm) of straight guide.

It is adaptable to any caravan because all the anchors are adjustable in height.

The fixation of the sides to the caravan is made of rubber-foam that can be welded to any surface and reinforced by side legs.

A new ventilation screen is incorporated in the side panel. The front consists of a large fixed window. Each side has a door.

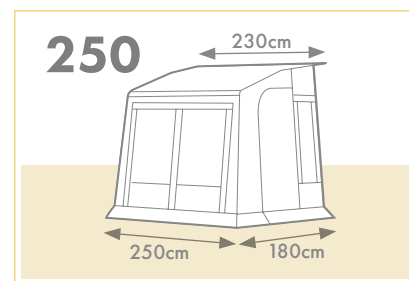

The whole set is designed to ease a quick assembly and give an optimal service in the space-functionality relationship.

CLASSIC
320/380

Reinforced structure

This awning has a roof with a double apex and reinforced seams. It is very strong and with a harmonious design.

This is a universal awning and may be adapted to most types of caravan, since the fixing system are adjustable in height.

The fixing system to the caravan consists of foam filled pads and Fix-On system adaptable to any surface and it is reinforced with side legs.

The only requirement is that your caravan has enough straight awning channel for the correct fitting of the porch.

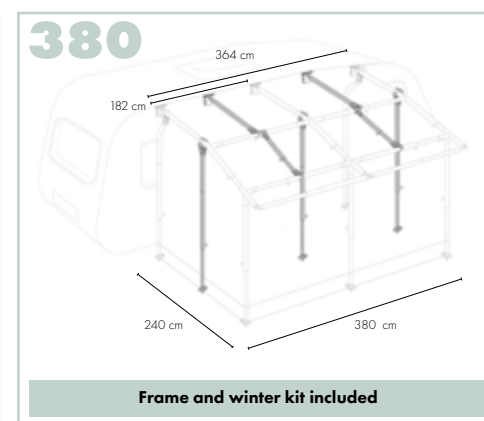

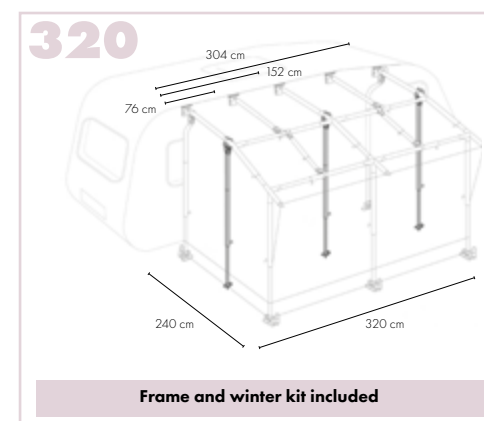

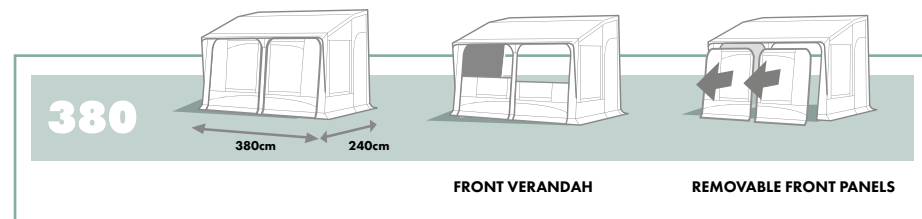

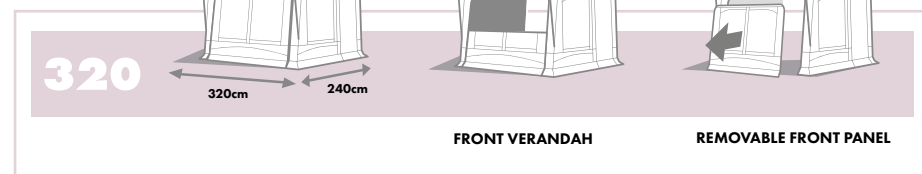

The front panel has two large fixed windows. It may be removed and may also be used as a verandah.

Each side panel has a door and a window (on the right panel it may be rolled up and has a mosquito net).

Optional Accesories:

Alpes

4 SEASONS
320 / 380 / 420

Four seasons Awning

The new Inaca Alpes 4 seasons combines the features of a winter awning with the versatility of a traditional awning.

All the panels are removable s, in a few seconds, we can turn the awning into an canopy.

The front panels are prepared to be folded down in a verandah configuration as well as to become front access doors.

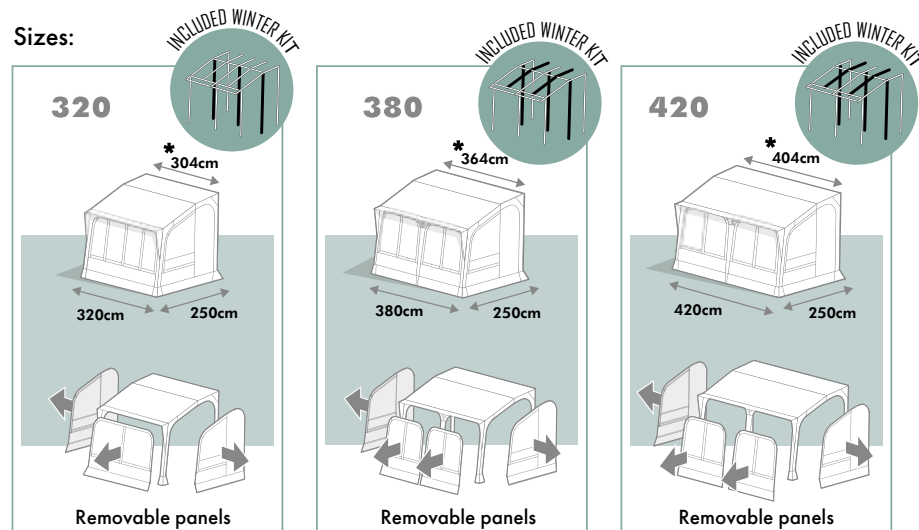

The adjustment of the sides to the caravan consists of foam adaptable to any surface and reinforced by side legs.

It is necessary that your caravan has enough space for a straight guide (*).

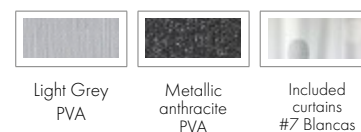

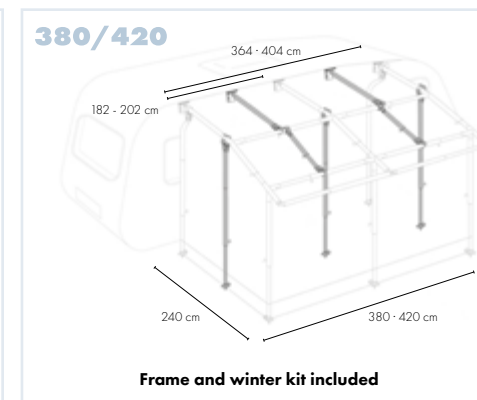

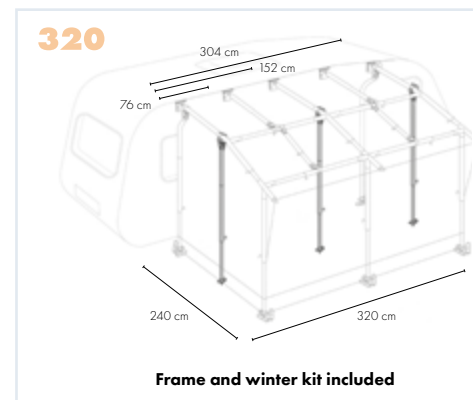

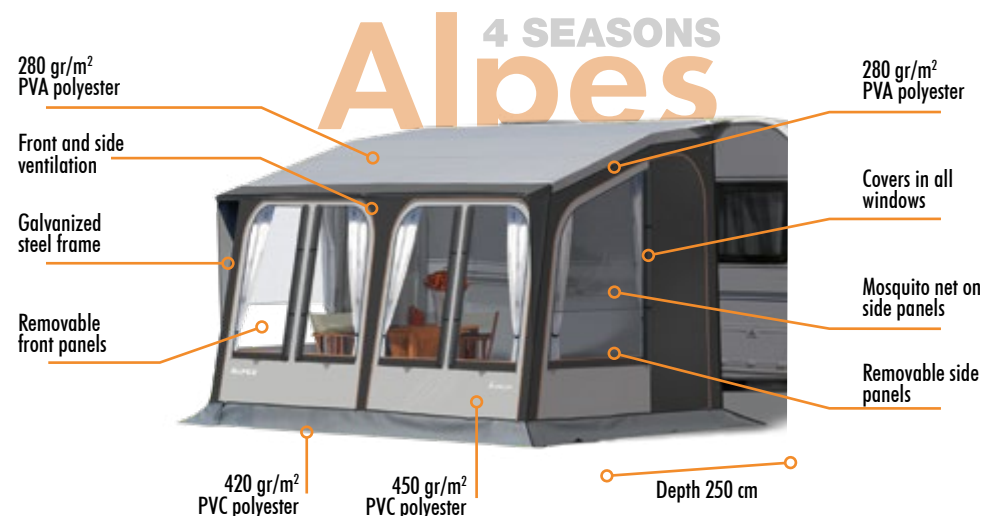

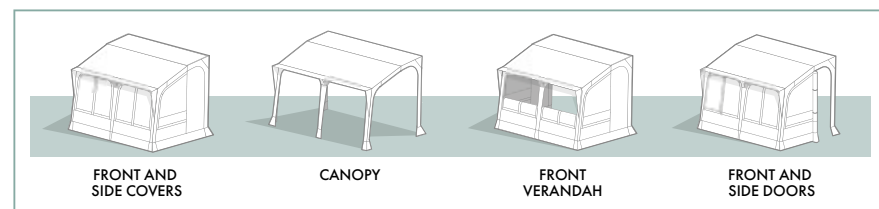

Both side panels have a door and a large window with a mosquito net.

It has opaque exterior covers on all windows.

With this QR code you will be able to access to the information related to the warranty of Inaca products.

INACA offers a wide range of awnings. Each of them has different performance qualities to satisfy every caravanner's specific needs. Therefore, it is very important to choose an awning that suits your needs.

Do not hesitate to ask your distributors for advice. Their professional assessment will help you with your choice.

Which is the most suitable awning for your caravan?

When buying your awning, our distributors will need to know the brand, model, and year of your caravan. If you are unsure about any of these facts, INACA offers you a quick and efficient guide classifying the awning's size according to the perimeter of each caravan.

For instance:

If your caravan has a perimeter of 956 cm (measurement from A to B), the appropriate awning for you is V-950.

Some important suggestions

Always pay special attention at measuring the perimeter of your caravan; the correct selection of the size you require is a determinant factor for the proper erection of your awning. According to the different sizes the distribution of the front panel may vary. Pay attention at the diagrams in order to avoid misunderstandings. Never pack your awning when wet. Never clean your awning with products that may damage the materials. When you use your PVC awning for the first time under rainy conditions, it is possible that the seams may leak initially. The problem will disappear when the stitching has swollen into place over the following days use.
